

## CLEARING NOTICE No 7 - 2011

### Oslo Clearing: cash equities - test system opening hours

The Oslo Børs test trading system (TradElect CDS test environment) is open until 20:45 CET Monday through Friday, however some segments may close earlier. Oslo Clearing has until now run the end-of-day routines in the cash equities test clearing system ('CCP Demo') after Oslo Børs has closed its test system.

**As of Monday 29 August 2011 Oslo Clearing will run the end-of-day routines 30 minutes earlier ie at 17:30 CET.**

The new time schedule for running end-of-day routines will not affect receipt of trades thus this will not affect testing in the trading system. Trades executed after 17:30 CET will not be registered in the clearing system and will not be included in the net settlement transactions sent to VPS.

The test opening hours will be as follows:

- Oslo Børs 09:00-20:45 CET (*unchanged*)  
See Oslo Børs web site [www.oslobors.no](http://www.oslobors.no) for detailed information regarding the opening hours for each segment
- Oslo Clearing 09:00-17:30 CET
- VPS 08:00-18:00 CET (*unchanged*)

We have registered that there are little test activity after 17:30 CET. On request from clearing members Oslo Clearing will offer extended test opening hours .
